Subject: Re: Kootenai River Network to Host Two Public Meetings on Water Quality in Lake Koocanusa

An addendum to the meeting announcement we just sent out. The Kootenai River Network (KRN) also anticipates involvement in the panel discussion from Tribal Nations - the Confederated Salish and Kootenai Tribes (CSKT) and the Kootenai Tribe of Idaho.

Hello Interested Kootenai Stakeholders -

The Kootenai River Network (KRN) is hosting two public meetings next week to discuss water quality in Lake Koocanusa. Presenters will provide updates on the development of a selenium site-specific criterion for Lake Koocanusa, and discuss coal mining operations in the Elk River Valley, British Columbia and associated impacts on water quality in Montana. The Montana Department of Environmental Quality will give an opening presentation on the status of efforts to develop a selenium site-specific criterion. The presentation will be followed by a panel discussion with representatives from the following organizations: Montana Department of Environmental Quality, US Environmental Protection Agency, British Columbia Ministry of Environmental and Climate Change Strategy, and Teck Coal Resources. The first meeting will be held in Libby on November 12 from 5:00-7:00 p.m. at the Kirby Maki Theater located at 724 Louisiana Avenue. The second meeting will be held in Eureka on November 13 from 6:00-8:00 p.m. at the Eureka High School auditorium located at 340 9th Street.

We hope that you will be able to attend one of the two meetings. And please spread the word to others that might be interested in attending!

Thanks and Best Regards,
Kootenai River Network
